A close-up photograph of a cat's nose, showing its characteristic cracked, leather-like texture. The nose is dark, and the surrounding fur is a mix of white and dark grey. The background is softly blurred, showing more of the cat's face and whiskers. A semi-transparent, reddish-brown oval shape is overlaid on the right side of the image, containing white Urdu text.

Lang Siy

Lang siy se zouti kominikasyon pou moun ki pa ka pale e ki pa ka tande epi sa ede moun ki gen pwoblèm pou pale ak tande. Siy sa yo itilize men, jès vizyèl ansanm ak espresyon vizaj.

Li vrèman enpòtan pou n konnen ke Ayiti gen pwòp lang siy pa l. Twò souvan Lang Siy Ameriken (*American Sign Language* - « ASL ») ta vle pran plas Lang Siy Ayisyen (« LSA »). Konfizyon sa a se yon gwo mal pou moun ki sèvi ak LSA. Fòk nou byen esplike moun sa LSA ye pou n rive kaba konfizyon sa a ant LSA ak ASL.
